PROFESSIONAL SUMMARY

Strategic Partnership Leader with 7+ years of commercial and technical expertise at the intersection of BESS and power markets. Proven track record of negotiating complex, multi-stakeholder contracts and orchestrating commercial frameworks with technology vendors to scale BESS deployments.

EXPERIENCE

Fluence Energy | Sr. Manager, Commercial Innovation [Oct 23 – Present] *Arlington, VA*

- **Orchestrating strategic alliances** with technology vendors to accelerate BESS deployment at data centers; co-authored white paper on **AI-driven power demand** (*Enabling the AI Revolution with Utility-Scale BESS*), directly expanding the strategic sales pipeline by 10%.
- **Architected and standardized global commercial frameworks** for 20+ BESS partnerships, utilizing modular TCO and forward-price models to ensure bankability and scalability across diverse regional markets.
- **Led the enterprise-wide transition to competitive pricing standards** by synthesizing global market intelligence and complex cost curves into repeatable frameworks used by Sales, Product, and Supply Chain to inform executive investment decisions.
- **Pioneered and operationalized four scalable commercial constructs (including CapEx-to-revenue-share models) that reduced deal friction in high-growth markets like ERCOT and CAISO, providing a blueprint for global regional adaptation.**
- **Featured speaker** at three global conferences, positioning Fluence as a market leader by educating stakeholders on the intersection of AI-driven power demand and the evolving utility-scale BESS landscape.

Fluence Digital | Business Development Manager [July 21 – Oct 23] *San Francisco, CA*

- **Expanded the U.S. digital market footprint**, doubling regional sales and generating **$8M+** in contract value by securing **Mosaic™ AI** bid-optimization and **Nispera SaaS comtracts** with major utilities and CCAs in CAISO.
- **Negotiated and executed** five complex, multi-stakeholder contracts on accelerated timelines, aligning Commercial, Legal, Product, and Finance workstreams to secure buy-in from customer executive teams.
- Built and governed a robust ecosystem of **40+ partnerships** with Independent Power Producers (IPPs), developers and utilities, resulting in a **50%** increase in customer retention and unlocking new upsell revenue through standardized proposals, term sheets, and offer documents.
- Spearheaded the commercial roadmap for three **high-impact product features** by synthesizing industry trends, TAM analysis, and competitive gaps; directed early-stage customer pilots to validate product-market fit before global release.
- **Standardized project valuation tools**, including sophisticated BESS economic models and Looker dashboards, enabling 10+ clients to make high-stakes, data-driven "go/no-go" investment decisions.

ENGRO Corporation | Assistant Manager, Corporate Strategy [Dec 2018 – Aug 2019] *Karachi, Pakistan*

- **Directed a $100M data center market-entry and 150MW energy strategy** by identifying key partners and mapping competitive positioning to inform executive investment decisions.
- **Advanced business development** for the logistics division by managing country-wide partnerships and directing 10+ pilot projects to validate new commercial service offerings.

ENGRO Fertilizers | Operations Engineer [Aug 2017 – Dec 2018] *Daharki, Pakistan*

- **Directed a cross-functional team of 20 personnel** at a large-scale manufacturing complex, managing operational efficiency projects that achieved $500K in annual savings while enhancing environmental compliance.

EDUCATION

Duke University| Masters of Energy and Environmental Management [May 2021] *Durham, NC*

- Recipient of the Nicholas Scholar Award with full tuition scholarship.
- Coursework in renewable project development, transport electrification, quantitative energy system modeling, wholesale power market analysis, energy finance & law, ESG & cleantech investments.

CERTIFICATIONS

- Pivotal 180: Renewable Energy Project Finance
- CELI: Clean Energy Leadership Institute Fellowship (2022)
- Bloomberg**:** Market Concepts

National University of Sciences and Technology | B.E Chemical Engineering [Jun 2017] *Islamabad, PK*

- Coursework in chemical and environmental engineering, operations management, engineering economics.
