PROFESSIONAL SUMMARY

Energy Transition Professional with 8+ years of expertise in energy storage and power markets. Proven track record of **negotiating and closing complex contracts** and leading **cross-functional task forces** to drive global portfolio growth. Expert in modeling energy storage project economics to maximize asset performance and drive high-stakes investment decisions.

EXPERIENCE

Fluence Energy | Sr. Manager, Commercial Innovation [Oct 23 – Present] *Arlington, VA*

- **Orchestrated strategic alliances** with technology vendors to accelerate BESS deployment at data centers; co-authored white paper on **AI-driven power demand** (*Enabling the AI Revolution with Utility-Scale BESS*), directly expanding the strategic partner pipeline by 10%.
- Engineered the commercial framework for 20+ BESS partnerships globally, leveraging complex TCO and forward-price modeling to align traditional energy market dynamics with the requirements of AI-driven infrastructure and utility-scale assets.
- **Directed cross-functional workstreams** (Sales, Product, Supply Chain) to synthesize global market intelligence into **competitive pricing frameworks**, accelerating executive-level strategic decisions for market-entry and scale.
- **Developed and executed four first-of-their-kind commercial models** in ERCOT and CAISO, linking CapEx discounts to **merchant revenue-sharing structures** to de-risk and unlock BESS deployment.
- **Established industry-wide market leadership** as a featured speaker at three global conferences, educating key stakeholders on the intersection of AI demand and the **optimization of utility-scale BESS assets**.

Fluence Digital | Business Development Manager [July 21 – Oct 23] *San Francisco, CA*

- **Secured $8M+ in new order intake** and doubled the U.S. digital market footprint by contracting AI-driven bid-optimization and asset-management software for utility-scale BESS portfolios.
- **Closed five complex contracts on accelerated timelines**, orchestrating cross-functional negotiations (Commercial, Legal, Product, Finance) and aligning terms with customer executive teams.
- Cultivated a robust ecosystem of **40+ partnerships** with Independent Power Producers (IPPs), resulting in a **50%** increase in customer retention and unlocking new upsell revenue through 20+ tailored proposals and RFP leadership.
- Spearheaded the commercial roadmap for three **high-impact product features** by synthesizing industry trends, TAM analysis, and competitive gaps; directed early-stage customer pilots to validate product-market fit for BESS optimization software.
- Optimized asset performance by developing sophisticated BESS economic models and Looker dashboards for 10+ clients, translating complex market volatility into **actionable bid-optimization strategies.**

ENGRO Corporation | Assistant Manager, Corporate Strategy [Dec 2018 – Aug 2019] *Karachi, Pakistan*

- **Directed a $100M data center market-entry and 150MW energy strategy** by identifying key partners and mapping competitive positioning to inform executive investment decisions.
- **Drove capital efficiency** by valuing a **$20M** divestment of coal assets and **reallocating capital toward solar and wind PPA opportunities**, successfully reducing portfolio emissions intensity by 30%.
- **Accelerated business development** for the logistics division by scaling country-wide partnerships and directing 10+ pilot projects to validate new commercial service offerings.

ENGRO Fertilizers | Operations Engineer [Aug 2017 – Dec 2018] *Daharki, Pakistan*

- **Led a 20-person cross-functional team** at a large-scale manufacturing complex, managing operational efficiency projects that delivered $500K in annual savings while ensuring strict environmental compliance.

EDUCATION

Duke University| Masters of Energy and Environmental Management [May 2021] *Durham, NC*

- Recipient of the Nicholas Scholar Award with full tuition scholarship.
- Coursework in renewable project development, transport electrification, quantitative energy system modeling, wholesale power market analysis, energy finance & law, ESG & cleantech investments.

CERTIFICATIONS

- Pivotal 180: Renewable Energy Project Finance
- CELI: Clean Energy Leadership Institute Fellowship (2022)
- Bloomberg**:** Market Concepts

National University of Sciences and Technology | B.E Chemical Engineering [Jun 2017] *Islamabad, PK*

- Coursework in chemical and environmental engineering, operations management, engineering economics.
